# End users want insights on who their peers are considering and then selecting in their market

## End user quotes

1. End users collect and leverage information from **multiple sources** as part of their technology buying and shortlisting process

*“I look at what Gartner is saying, do my own research, and discover new vendors at conferences or from peers and colleagues”*

2. End users want to have **peer-considered providers** on their radar

*“Today, I use my peer network to help with sourcing the list of vendors I should be considering”*

3. ‘Best fit’ provider for the end user is dependent on individual use cases; it is **insufficient to focus only on one segment of providers**

*“In some cases, we’ve gone with small, lesser known players that are great in a highly specialized area, and for others, we need a vendor that has better breadth (vs depth) of capabilities”*

# Introducing: Gartner Peer Insights ‘Vendor Spectrum’

## Gartner Peer Insights ‘Vendor Spectrum’

Date: 1 March 2019 — 28 February 2020

Vendors sorted alphabetically

Notes: The providers shown in the graphic are based on 269 reviews submitted between 1 March 2019 and 28 February 2020 and published. The calculations use vendor name captured as part of the review process, and responses to the question "What other vendors were considered?" (multiple responses allowed). Providers that are below market median for "consideration" and "selection when considered" are not shown. Providers in each group are listed alphabetically. For more details, please see the full Methodology.

- Written for **end users** to help in technology provider **discovery, shortlisting and buying processes**, particularly in the early phases
- Includes **not only the providers whose products were selected, but also the broader set of providers who were considered** in these decisions
- Consideration is based on responses to the Peer Insights question **“What other vendors did you consider in your evaluation?”**
- Aligned to **Peer Insights markets**
- Available for providers as a **reprint**

## Overview of the market

### Gartner Peer Insights 'Vendor Spectrum': Consideration of Meeting Solutions

#### Peer Contributors

Gartner Peer Insights is a free peer review and ratings platform designed for enterprise software and services decision makers. Reviews go through a strict validation and moderation process in an effort to ensure they are authentic.

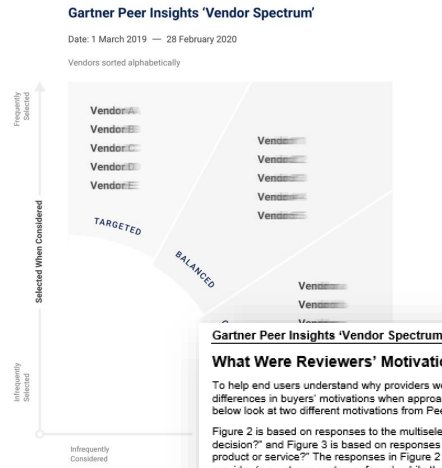

#### Overview

#### What Are Meeting Solutions?

Meeting solutions are real-time collaboration app interactions over a network between participants. Some vendors segment their product lines to target others offer broad solutions that work for many people equally well for workers in meeting spaces, at the messaging and content sharing. Organizations use internal use — for collaboration, learning and internal external use in sales or marketing. Such complex more than one vendor. Complete meeting solutions combining messaging, content and screen sharing.

#### What Is Gartner Peer Insights 'Vendor Spectrum'?

Since October 2015, more than 335,000 reviews Gartner Peer Insights. The 'vendor spectrum' document includes not only the providers whose products were considered in these decisions. End users, at shortlisting and buying process, can use this document otherwise considered. It provides an additional Magic Quadrant, Critical Capabilities and Peer Insights users are evaluating providers and solutions.

### Gartner Peer Insights 'Vendor Spectrum': Consideration of Meeting Solutions

#### What Were Reviewers' Motivations for Their Decision?

To help end users understand why providers were selected when considered, this section highlights differences in buyers' motivations when approaching their selection of a meeting solution. Figures 2 and 3 below look at two different motivations from Peer Insights questions.

Figure 2 is based on responses to the multiselect question "What were the key factors that drove your decision?" and Figure 3 is based on responses to the multiselect question "Why did you purchase this product or service?" The responses in Figure 2 reflect aspects that the enterprise IT buyer seeks in a provider (e.g., strong customer focus), while the responses in Figure 3 point toward internal buyer-side motivations (e.g., drive revenue growth).

In some cases, the same response may be listed for more than one group. For example, if "strong consulting partnership" was listed as one of the most frequent factors for both the targeted and broad consideration group, this means that this factor was selected more frequently in the targeted and broad consideration groups, relative to the balanced group.

Figure 2 uses Peer Insights responses to the question "What were the key factors that drove your decision?" that are most and least frequently chosen, relative to other groups.

Figure 2. Gartner Peer Insights 'Vendor Spectrum' View of Responses to the Question "What Were the Key Factors That Drove Your Decision?" for Meeting Solutions

#### Key factors that drove the decision relative to other groups

	Balanced	Broad Consideration	Targeted
<b>Most frequent</b>	<ul style="list-style-type: none"> <li>Strong consulting partnership</li> <li>Product functionality and performance</li> </ul>	<ul style="list-style-type: none"> <li>Pre-existing relationships</li> <li>Overall cost</li> </ul>	<ul style="list-style-type: none"> <li>Breadth of services</li> <li>Product roadmap and future vision</li> </ul>
<b>Least frequent</b>	<ul style="list-style-type: none"> <li>Pre-existing relationships</li> <li>Overall cost</li> </ul>	<ul style="list-style-type: none"> <li>Strong consulting partnership</li> <li>Product roadmap and future vision</li> </ul>	<ul style="list-style-type: none"> <li>Financial/organization viability</li> <li>Pre-existing relationships</li> </ul>

Notes: The table above represents Gartner Peer Insights responses to the question "What were the key factors that drove your decision?" Reviewers can select multiple responses and responses have been aggregated for providers in each group. Most frequent and least frequent results are based on what is frequently chosen, on aggregate, relative to other groups and do not reflect absolute selection frequency. Based on reviews submitted between 1 March 2019 and 28 February 2020 and published.
